Vertical static load = - kN
Vertical dynamic load = - kN
MAX Displacement = ± mm
Horizontal stiffness = kN/mm
Damping = -%

Note A: Protective Anticorrosion Cycle According to EN 1337-9
1. Sand-blasting of white metal SA2.5
2. Bicomponent epoxidic covering of high thickness
   Minimum thickness dry film
   a) Exposed surfaces: 250 micron
   b) Worked surfaces and contact surfaces of the concrete: 70 micron
